

2.1. IMAGING SUB-SYSTEM

No	COMPONENT	SPECIFICATIONS		
1	Software EnsoMOSAIC FlightPlan	<ul style="list-style-type: none"> Numeric flight planning in MS-Excel Graphical flight line design in ArcGIS and in QGIS Exporting the flight lines into the navigation software NavCam 		
2 a	EnsoMOSAIC Flight Control Hardware and Software “Aircraft power”	<p>Hardware</p> <ul style="list-style-type: none"> System synchro integrating GNSS and cameras with flight control software GNSS unit, specified at Item 3 Input 12 V or 24 V from external power supply Output 110V or 220V, 12 V optional Cabling Housing dimensions: 45 x 16 x 36 cm Weight 7 kg <p>Software NavCam</p> <ul style="list-style-type: none"> Display of flight track and route and the position of the aircraft. Display of aircraft deviation and other flight data for the pilot Trigger camera Store flight log and image metadata 	 	
2 b	EnsoMOSAIC Flight Control Hardware and Software “Internal battery”	<p>Hardware</p> <ul style="list-style-type: none"> System synchro integrating GNSS and camera with flight control software GNSS unit, specified at Item 3 Battery to support GNSS unit and camera for min 6 hours. Cabling Housing dimensions: 35 x 14 x 29 cm Weight 6 kg <p>Software NavCam</p> <ul style="list-style-type: none"> Display of flight track and route and the position of the aircraft. Display of aircraft deviation and other flight data for the pilot Trigger camera Store flight log and image metadata 	 	

3a	GNSS	<ul style="list-style-type: none"> • Novatel FlexPak6 <ul style="list-style-type: none"> ▪ Single frequency L1 ▪ GPS, DGPS, SBAS ▪ Accuracy, Single point L1 1.5m (RMS) • Novatel Antenna <ul style="list-style-type: none"> ▪ GPS L1 ▪ FAA certified 		
3b	GNSS	<ul style="list-style-type: none"> • Novatel FlexPak6 <ul style="list-style-type: none"> ▪ Dual frequency L1/L2 ▪ GPS, DGPS, SBAS, L-band ▪ Accuracy, Single point L1/L2 1.2m (RMS) ▪ Accuracy, SBAS 0.6m (RMS) ▪ Accuracy, Terrastar 0.1m (RMS) (optional) ▪ Accuracy, RTK 1cm+1ppm (optional) • Novatel Antenna <ul style="list-style-type: none"> ▪ GPS L1/L2 + L-band ▪ FAA certified • Cellular modem (not included) <ul style="list-style-type: none"> ▪ for GSM network RTK signal 		
3c	GNSS	<ul style="list-style-type: none"> • Item 3b + GLONASS 		
3d	GNSS / INS	<p>Novatel SPAN-IGM-A1</p> <ul style="list-style-type: none"> • Novatel OEM615 <ul style="list-style-type: none"> ▪ Dual frequency L1/L2 ▪ GPS, DGPS, SBAS, L-band ▪ Accuracy, Single point L1/L2 1.2m (RMS) ▪ Accuracy, SBAS 0.6m (RMS) ▪ Accuracy, Terrastar 0.1m (RMS), (optional) • IMU ADIS-16488 <ul style="list-style-type: none"> ▪ Gyroscope bias stability 5 deg/h ▪ Roll+Pitch accuracy, RTK mode 0.035 deg ▪ Heading accuracy, RTK mode 0.150 deg • Novatel Antenna <ul style="list-style-type: none"> ▪ GPS L1/L2 + L-band, FAA certified 		
3e	GNSS / INS	<p>Novatel SPAN-IGM-S1</p> <ul style="list-style-type: none"> • Novatel OEM615 <ul style="list-style-type: none"> ▪ Dual frequency L1/L2 ▪ GPS, DGPS, SBAS, L-band ▪ Accuracy, Single point L1/L2 1.2m (RMS) ▪ Accuracy, SBAS 0.6m (RMS) ▪ Accuracy, Terrastar 0.1m (RMS), optional • IMU STIM300 <ul style="list-style-type: none"> ▪ Gyroscope bias stability 0.5 deg/h ▪ Roll+Pitch accuracy, RTK mode 0.015 deg ▪ Heading accuracy, RTK mode 0.080 deg • Novatel Antenna <ul style="list-style-type: none"> ▪ GPS L1/L2 + L-band, FAA certified 		
3f	GNSS / INS	<p>Novatel SPAN-CPT</p> <ul style="list-style-type: none"> • Novatel OEM628 <ul style="list-style-type: none"> ▪ Dual frequency L1/L2 ▪ GPS, DGPS, SBAS, L-band ▪ Accuracy, Single point L1/L2 1.2m (RMS) ▪ Accuracy, SBAS 0.6m (RMS) ▪ Accuracy, Terrastar-D 0.06m (RMS), optional • IMU CPT <ul style="list-style-type: none"> ▪ Gyroscope bias stability 1 deg/h ▪ Roll+Pitch accuracy, RTK mode 0.015 deg ▪ Heading accuracy, RTK mode 0.030 deg • Novatel Antenna <ul style="list-style-type: none"> ▪ GPS L1/L2 + L-band, FAA certified 		

3g	GPS / INS	Vectornav VN-200 <ul style="list-style-type: none"> • GPS <ul style="list-style-type: none"> ▪ Single frequency L1 ▪ GPS, SBAS ▪ Accuracy, Single point L1 2.5 m (RMS) ▪ Accuracy, SBAS 2.0 m (RMS) • IMU <ul style="list-style-type: none"> ▪ Gyroscope bias stability <10 deg/h ▪ Roll+Pitch accuracy, 0.1 deg ▪ Heading accuracy, 0.3 deg • Antenna <ul style="list-style-type: none"> ▪ GPS L1 		
4	Camera mount	<ul style="list-style-type: none"> • Constructed / supplied locally to fit the airplane to be used for imaging 		
5	Battery and charger	<ul style="list-style-type: none"> • For testing the flight equipment on the ground • For running the flight equipment disconnected from aircraft power source 		
6a	Laptop computer Lenovo X260 or equivalent for flight management	<ul style="list-style-type: none"> • With USB 3.0 port for GNSS and trigger signals • With fixed external display port or USB 3.0 port for navigation display • Disk: 500 GB HDD • Processor: Intel Core i7 • Memory: 4 GB DDR • Win 10 Pro 64 • 9-cell battery, power back-up from flight control hardware for 5 hours flight time 		
6b	Laptop computer Lenovo X260 or equivalent for image storage	<ul style="list-style-type: none"> • With USB 3.0 ports for image input • Disk: 512 GB SSD • Processor: Intel Core i7 • Memory: 8 GB DDR • Win 10 Pro 64 • 9-cell battery, power back-up from flight control hardware for 5 hours flight time 		
7 a	Camera Canon EOS 6D CIR configuration	<ul style="list-style-type: none"> • 36 x 24 mm CMOS sensor, 21 Megapixels (5472*3648). • Colour depth 14 bits (RAW) or 8 bits (JPG). • Image storage into SD/SDHC/SDXC memory cards • Maximum shutter speed 1/4000 sec • With battery, AC-adapter and battery charger • With lens Canon 50 mm/1.4 USM • With lens Canon 28 mm/2.8 IS USM • With a protective case for the camera and accessories • Geometrically calibrated, with certificate 		
7 b	Camera Canon EOS 5Ds R RGB configuration	<ul style="list-style-type: none"> • 36 x 24 mm CMOS sensor, 50.6 Megapixels (8688*5792). • Colour depth 14 bits (RAW) or 8 bits (JPG). • Image storage into CF or SD/SDHC/SDXC memory cards • Maximum shutter speed 1/8000 sec • With battery, AC-adapter and battery charger • With lens Canon 50 mm/1.4 USM • With a protective case for the camera and accessories • Geometrically calibrated, with certificate 		

7 b	Camera PhaseOne iXU-RS1000	<ul style="list-style-type: none"> • Sensor 11,608 x 8708 pixels, 53.4mm x 40.0mm • RAW image storage into external storage device • With lenses as specified in the main document • With software iX Capture • With software Capture One • Geometrically calibrated, with certificate 		
7 c	Camera Rikola hyperspectral	<ul style="list-style-type: none"> • Default spectral range 500 – 900 nm • Min spectral resolution 10 nm, FWHM • Spectral step <1 nm • Up to 50 frames on single exposure in-flight • 16 frames / 1.6 seconds • Integration time 5-15 ms • Default spectral image 1024 x 1024 pixels • FOV 37°, horizontal and vertical • Power consumption <6 W • Weight 700 g • Size 75 mm x 90 mm x 152 mm • With GPS and irradiance sensor • With control and band matching software • Default image format ENVI, output also TIF • Calibrated 		
8	Memory cards Sandisk or equivalent	<ul style="list-style-type: none"> • Capacity 64 or 128 GB • 2 units 		
9	Navigation display Niceview 8" TFT SVGA	<ul style="list-style-type: none"> • TFT display of 8 inches • Resolution max 1024*768, native resolution 800x600 • Display of the deviation of the aircraft from the flight line for the pilot • Connects to a parallel display port of the navigation laptop • Control of the flight control software by touch screen 		
10	GIS software QGIS or ArcGIS	<ul style="list-style-type: none"> • Design of flight lines • Also needed in image processing sub-system for orthomosaic resampling 		
11	Camera Pod	<ul style="list-style-type: none"> • For Cessna 172, 182, 206, GA8 and similar models • For SLR and medium format cameras • One or two cameras or other sensors • Mounts to left / right / both wings • Vertical or oblique imaging • GNSS and battery compartment • Wireless or cable control • Payload 10 kg • Diameter 230 mm, length 760 mm • STC by Transport Canada 		
12	Training, Imaging	<ul style="list-style-type: none"> • Basics of aerial imaging and camera operation • Definition of flight parameters • Design of the flight lines • Electricity systems 		

	2 days	<ul style="list-style-type: none">• Installation of the camera• Camera configuration• Installation and operation of the orientation sensor• Aircraft navigation and camera triggering with laptop and NavCam• Camera control• Verification of flight track and altitude• Control of image quality• Test flights and training flights		
--	--------	---	--	--

2.2. IMAGE PROCESSING SUB-SYSTEM

No	COMPONENT	SPECIFICATIONS		
1	Software EnsoMOSAIC Fusion	<ul style="list-style-type: none"> • Automatic location of tie points from overlapping images applying feature extraction • Image rectification by block adjustment • A set of spectral corrections • Dense point cloud generation • Automatic DEM generation • Output mosaic resampling with internal or external DEM • Runs on Windows 7/8/10, 64 bits • Processes large, medium and small format images • Processes single flight line imagery for corridor mapping • Processes multispectral and hyperspectral imagery • Processes data of different camera types and multi-camera systems simultaneously (camera fusion) • Does not require initial orientations from IMU, optional • Software manual and tutorial videos 		
2	Computer PC	<ul style="list-style-type: none"> • Minimum RAM 8 GB, CPU 1 GHz, disk 100 GB • Recommended RAM 32 GB, CPU 3 GHz, disk 750 GB • Min 17" monitor • MS Win 7/8/10, 64 bit 		
3	Training Image processing 2 days	<ul style="list-style-type: none"> • Camera calibration • Organizing the data on hard disks • Creating EnsoMOSAIC image block • Automatic and manual tie point measurement • Entering ground control points • Aerial triangulation • Automatic point cloud generation • Spectral corrections • Mosaic resampling • Quality control and error correction 		

2.3. IMAGE UTILIZATION SUB-SYSTEM

No	COMPONENT	SPECIFICATIONS		
1	Monitor LG Cinema 3D or equivalent	<ul style="list-style-type: none"> 3D display resolution 1920 x 1200 (active 3D) or 1920 x 600 (per eye, passive 3D) Interface DVI + VGA Size 24 " diagonal With polarized or active lenses (2 pieces) 		
2	Computer PC	<ul style="list-style-type: none"> Minimum RAM 1 GB, CPU 1 GHz, disk 100 GB Recommended RAM 4 GB, multi-core CPU 2 GHz, disk 500 GB Graphics card: <ul style="list-style-type: none"> Minimum for passive stereo: OpenGL support Recommended for active stereo: NVIDIA Quadro 4000 		
3	EnsoMOSAIC Agri	<ul style="list-style-type: none"> QGIS plugin + field reflectance targets reflectance plates 50 * 50 cm, 2%, 23% and 44 % Reflectance and true NDVI calculation For any frame cameras (3 – n bands) Prescription maps in vector format In case of modified CIR cameras cleans unwanted NIR from RED and Green, output NIR, RED, GREEN 		
4	Software EnsoMOSAIC 3D	<ul style="list-style-type: none"> XYZ – point cloud from oriented images DSM and DTM calculation Z -points from 1 or 2 stereo models Runs on multi-core CPUs DSM export to EnsoMOSAIC for near-true orthos 3D visualization 3D digitizing into external database (e.g. ArcGIS, AutoCAD and MicroStation) Calculation of contours and volumes 		
5	Training Image utilization 3D 2 days	<ul style="list-style-type: none"> Hardware and software setup Stereoscopic viewing Introduction to 3D analysis Importing image orientations Calculating point clouds Calculating elevation models Calculating contours Volume calculations 3D-digitizing Internal and external databases 		

2.4. MAINTENANCE AND SUPPORT

No	COMPONENT	SPECIFICATIONS		
1	Maintenance and support for EnsoMOSAIC, EnsoMOSAIC 3D NavCam,	<ul style="list-style-type: none"> • All new software versions and documentation, delivered electronically or through Support Area Services. • Maintenance of e-mail address for contacts with the Customer • Technical support for the Software by e-mail, telephone and internet. • Right to order at hourly fee the following additional maintenance and support services: <ul style="list-style-type: none"> • Analyzing and processing data of the Customer • Solving user errors and operator-related problems • Project planning and implementation for imaging and image processing • Training in Software operation • Software development specified by the Customer
