

Camera pod for small aircraft

MosaicMill offers a flexible pod for medium size cameras, small LiDARs and other imaging instruments.

The pod holds either two cameras or one camera and an optional sensor. Mounts to either left wing or right wing or both. The cameras can look vertically down or oblique sideways, forward or backward.

- For Cessna 172, 182, 206 and similar models
- Interchangeable between different aircraft
- Fitting takes 10 – 20 minutes
- Adjustable in roll, pitch and yaw
- GNSS and battery compartment
- Wireless or cable control
- Certified by Transport Canada and the FAA

Takes for example:

PhaseOne medium format and HSC-2 hyperspectral, or two Canon 50 Mp DSLRs for RGR and IR, or 100 Mp PhaseOne iXA and iMar FSAS IMU

Empty weight 5 kg, payload 10 kg
Diameter 230mm, length 760mm
